California’s Medication Assisted Treatment (MAT) Expansion Project

Michael Freeman, Section Chief
Substance Use Disorder Compliance Division
April 8, 2019
In 2017, California had …

- 2,196 opioid overdose deaths
- 429 fentanyl overdose deaths
- 4,281 opioid overdose ED visits (excluding heroin)
- 21,787,042 opioid prescriptions

MAT Expansion Project
MAT Expansion Project Objectives

1. Develop additional MAT locations through strategic access points

2. Provide MAT services to specialized or underserved populations

3. Transform entry points for individuals with an OUD and create effective referrals into treatment

4. Develop coordinated referral processes to better manage high-risk transitions of care (e.g. jails or hospital re-entry)

5. Engage prospective and current prescribers to increase provision of MAT

6. Enact overdose prevention activities to prevent opioid misuse and OUD deaths
Overview of Key MAT Expansion Projects
The NDP aims to reduce opioid overdose deaths through the provision of free naloxone, in its nasal spray formulation. Entities apply to DHCS to have naloxone shipped directly to their address.

The program started October 1, 2018 and hundreds of applications have been received. Eligible entities include law enforcement agencies such as police departments, county jails and probation; fire, EMS and first responders; schools and universities; county public health and behavioral health departments; harm reduction organizations; and community organizations such as local opioid coalitions.

The NDP has distributed more than 155,000 units of naloxone since October 2018.

To download the application and for more information, visit the DHCS website: https://bit.ly/2w2Vx9f.
NDP Applications by Type of Organization

- Law Enforcement & Criminal Justice: 41%

**TOTAL** 7296
The California Bridge Program is developing hospitals and emergency rooms into primary access points for the treatment of acute symptoms of SUDs – enhancing and increasing access to 24/7 treatment in every community in the state.

As of March 2019, 31 health care facilities are participating in the California Bridge Program, spanning 27 counties throughout the state.

Participating sites address substance use disorders as a treatable chronic illness and utilize harm reduction techniques, such as naloxone distribution, to minimize the risks associated with substance use disorders.

The program has been profiled in the New York Times and Vox.

Technical assistance materials are available to any clinician at www.bridgetotreatment.org.
27 counties
Alameda
Butte
Contra Costa
El Dorado

🌟 Star sites will become 'centers of excellence' for initiating treatment for substance use disorders from the inpatient ED, or prenatal settings and work with other hospitals to spread best practices.

🔺 Rural Bridge sites will provide new access points for evidence-based treatment for substance use disorders primarily, in the emergency department.

⚠️ Bridge clinics offer 'low-threshold' follow-up for patients started on treatment in the acute care setting, assisting patients with overcoming barriers to continued long term outpatient treatment in the community.

WHAT IS A SUN?
A substance use navigator (SUN) is a care coordinator and an integral team member that improves access to Medication for Opioid Use Disorder (MOUD). A SUN is embedded within either an emergency department (ED) or an inpatient setting to assist patients to begin and remain in addiction treatment via motivation, resources, and encouragement. An essential link to the community, SUNs outreach to treatment partners and facilitate transitions from the acute care setting to outpatient treatment. They also provide a direct link to organizations and individuals seeking treatment.
Expanding Access to MAT in County Criminal Justice Settings

• Focuses on expanding access to at least two forms of MAT to persons in jails and drug courts.

• 23 participating counties form teams consisting of leaders from jail health care services, jail custody operation, county manager’s office, probation, drug courts, county AOD programs, and others.

• Teams participate in in-person learning collaboratives to expand knowledge of addiction treatment, share best practices, and develop or expand county-specific MAT programs in jails and drug courts.

• Teams receive monthly coaching calls and technical assistance. A series of webinars and podcasts specific to MAT in criminal justice are available to the teams and to the public at https://matincountycj.healthmanagement.com/.
Expanding Access to MAT in County Criminal Justice Settings

**GOALS**

The overall goal of this program is to increase access to Medicated Assisted Treatments in jails and drug courts. Each county starts at a different point in access to MAT and need not end at the same point. Therefore, individual county goals are different, depending on how far along the county is regarding implementation of MAT in the criminal justice system.

The California H&SS consists of narcotic treatment program (Hubs) and office-based treatment settings (Spokes) that provide ongoing care and treatment. The program aims to increase the number of providers prescribing buprenorphine for opioid use disorder.

- Composed of 18 Hubs and over 215 Spokes through a diverse network of community health partners.
- The CA H&SS is improving, expanding, and increasing access to MAT services throughout the state, especially in counties with the highest overdose rates.
- For additional information, visit [www.dhcs.ca.gov/individuals/Pages/CA-Hub-and-Spoke-System.aspx](http://www.dhcs.ca.gov/individuals/Pages/CA-Hub-and-Spoke-System.aspx).

Transitions of Care

• The Transitions of Care project aims to strengthen the addiction treatment eco-systems in California counties and decrease gaps in coordination of patient transitions moving between higher and lower levels of care.

• The work will include surveying treatment systems stakeholders, developing gap analyses, conducting on-site process improvement events, and ongoing TA to increase the number of MAT access points and the overall addiction treatment capacity.

Locations

Counties: Fresno, Humboldt, Imperial, Kern, Lake, Mendocino, San Diego, San Francisco (tentative), Orange, & Ventura
MAT Access Points

- MAT Access Points aims to support MAT start-up activities and/or MAT enhancement efforts in at least 200 MAT Access Points throughout California, with the goal of increasing the number of patients treated with medications, counseling and other recovery services.

- MAT Access Points will ensure the delivery model enables positive treatment outcomes, safe management of care transitions, and long-term recovery.

- Eligible organizations include primary care facilities, hospitals, emergency departments, narcotic treatment programs/medication units, jails, residential centers, tribal health centers, DUI providers, community or county mental health centers, social services providers, community-based organizations, or other organizations either building new MAT access or expanding current MAT capacity.

- Funding can be used to purchase equipment, train staff, recruit staff, make capital improvements, and for other start-up and enhancement costs.
The Perinatal MAT project aims to decrease neonatal abstinence syndrome severity and length of stay in the hospital, and increase the number of mothers in long-term recovery through MAT.
• The goal of the California Youth Opioid Response (YOR California) is to improve and expand access to prevention, intervention, and recovery services, as well as access points to medications for opioid use disorder (MOUD) as indicated, for youth (ages 12–24) and their families, thereby preventing opioid overdose-related deaths.

• This request for applications (RFA) provides up to $11 million in funds for local and statewide efforts to reduce OUD among youth through increased access to enhanced youth-appropriate continuum of services including but not limited to MOUD.
The Tribal MAT Program aims to improve MAT access for urban and tribal communities by increasing the total number of waivered prescribers certified, and providing expanded MAT services that incorporate the values and culture of the communities being served.

The Tribal MAT Program is composed of the following projects:

- **MAT Champions**: Activities include engaging county local opioid coalitions/beginning Tribal opioid coalitions.
- **Project ECHO**: Designed to expand MAT in Tribal and Urban communities.
- **OUD Suicide Prevention**: Services include OUD prevention, suicide prevention, and development of curriculum around suicide prevention and its relation to OUD.
- **Needs Assessment**: A statewide needs assessment to determine the MAT needs of the Tribal and Urban Indian communities in California.
- **Tele-MAT**: Aims to provide MAT telehealth services for patients with OUD and co-occurring disorders in 12 Indian Health Programs statewide.
Toolkits

- Informational toolkits will be developed for a variety of stakeholders and target audiences.
- As each toolkit is finalized, an informational webinar will be hosted to summarize the content, and how the toolkit can be best utilized.
- A toolkit for residential treatment providers is available at [www.dhcs.ca.gov/provgovpart/Pages/Training-and-Resources.aspx](http://www.dhcs.ca.gov/provgovpart/Pages/Training-and-Resources.aspx)
- Upcoming toolkit topics/audiences include:
  - Consumers
  - Counselors
  - DUI Providers
  - Criminal Justice
  - Employers
  - Hospitals & emergency departments
  - Outpatient Facilities

Proven treatment for opioid addiction starts here. ChooseMAT.org
“Let’s talk about treatment options.”

Proven treatment for opioid addiction starts here.

Medication Assisted Treatment (MAT) is the use of FDA-approved medications for the treatment of opioid addiction. When coupled with counseling, MAT treats the whole patient and significantly reduces the rate of relapse. Medi-Cal, Medicare and many private insurance plans cover MAT. You can get MAT through a primary care doctor, licensed narcotic treatment programs, outpatient treatment programs, or licensed residential treatment facilities.

Find a proven treatment option that’s right for you at ChooseMAT.org.

### Young People in Recovery

- Young People in Recovery (YPR) is a grass roots organization focused on creating recovery-ready communities throughout the nation for young people in, or seeking, recovery.
- YPR is partnering with the DHCS to launch YPR chapters and life-skills curriculum programs to individuals in recovery from opioid use and substance use disorders.

### Primary Care Residency

- The California Academy of Family Physicians will develop and implement addiction medicine and MAT curriculum in residency programs throughout California.
